Downtown Perspective - Steel Truss Bridge	3	Suwanee Dam Road Bridge	8
Downtown Perspective - Architectural Bridge	4	Total estimates spreadsheet	9-10
Burnette Trail Road Bridge	5		

- I created all plans, rendering and estimates for concepts for 3 pedestrian bridges in Sugar Hill, Georgia
- the bridges are presented in two styles, architectural (concrete) and steel truss. There is a price change for each style.
- items to consider were auto circulation under the bridge, making the bridge ramps ADA compliant, and minimizing fill and cut soil (placing the ramps at the best possible location so their ends could meet grade smoothly)
