

The Grand Canyon's sedimentary strata formed for millions of years over an igneous-metaphorphic bedrock before being carved nearly a mile deep by the Colorado River.

Glen Canyon Dam generates five-billion kilowatt-hours annually that power western states. In the Navajo Nation, 27% of homes do not have electricity.

Sacred mountains of Dibé Nitsaa, Sisnaajini, Dook'o'osłíí and Tsoodzil frame the Dinétah, the Navajo homeland. In the 19th century, treaties with the US minimized their territory to the present Navajo Nation border, as shown.

US metros overshadow the Navajo Nation's cities in population and economy. As US citizens, many Navajo attend university and make their careers off-reservation. Of all Navajo in the US, less than half live within the Navajo Nation.
